Group # 1 Skill Builder 11 Final Group Grid Self-Assessment

Group # 1 consists of five group members. Four of our group members work together at the beginning of our group project. Unfortunately, I group member withdrew from our group, because of work related issues. Our professor Lisa Blaschke provides feedback on our Current Trends and Future Waves project. Immediately after we receive our feedback information, we conducted our discussion to set up a conference call, in order to perform our various individual and group tasks. Mary (Lynn), Rendandi, and I were present for the conference call communication. Debra was absent, and she was updated with information by email and through the study group section. I started the thread for our final project in our Study Group Area. Based on our discussions, Lynn posted our tasks that are required to complete our final group grid. Then my group members and I recorded our contributions in the study group section for our final grid. It was very incredible that, our [Skill Builder 11 Group 1 Final Grid](https://docs.google.com/spreadsheets/d/1HOt7NiS6KM1nkNHbPNEnzVbO51Y683ubFaHo5rB-A/edit#gid=0) (this project) outcome was completed successfully. This is our URL: (<https://docs.google.com/spreadsheets/d/1HOt7NiS6KM1nkNHbPNEnzVbO51Y683ubFaHo5rB-A/edit#gid=0>) for our Group 1 Grid.

It is also important to highlight that our professor Lisa Blaschke guided my group members and I towards the successful completion of our final group project. I will therefore emphasize that my team members and I worked until we finally completed our final group project, with the continuous support of our instructor Lisa. We have used conference call, Google docs, emails and our study group discussion areas to communicate on our project. We recorded our information in the Study Group area. Ninety-nine percent of our communication was done in our study group area. I have no challenging issues to report about our group 1 grid, because we all learn our lesson and solved all challenging issues prior to the final completion of our Skills Builder 11 group 1 Final Grid. This project has certainly broaden my awareness on OMDE 601 9040 Foundations of Distance Education & E-learning (2152) course, which uphold the course objectives in the syllabus. I must therefore confess that I am elated to emphasize how privileged and honored I feel to work with everyone towards the successful completion of our final project.

The support from our instructor will continue beyond classroom sessions. Professor Lisa and my fellow students have inspired and channel my learning skills to sustain [Julia's Wealth of Knowledge](#) for the workplace and connecting with the global face-to-face and Distance Education and e-Learning environments.
