Group # 1 Skill Builder 10 Future Wave Current Trends Self-Assessment

Group # 1 consists of five group members. Four of our group members work together at the beginning of our group project. I started the thread for our project in our Study Group Area. Then Rendandi lead the group project by compiling his information, along with my information that was recorded in the grid. Debra and Lynn (Mary) recorded their information simultaneously later on in the grid. I updated the references, and Lynn and I assisted Debra in updating the document. In this view, three out of five group members participated towards the end of the Project. In addition, despite the challenges that occurred, it was very remarkable that, our [Skill Builder 10 Current Trends Future Wave Group 1 Grid](https://docs.google.com/spreadsheets/d/1HOt7NiS6KM1nkNHbPNEnzVbO51Y683ubFaHo5rB-A/edit#gid=0) (this project) outcome was completed successfully. This is our URL: (<https://docs.google.com/spreadsheets/d/1HOt7NiS6KM1nkNHbPNEnzVbO51Y683ubFaHo5rB-A/edit#gid=0>) for our Group 1 Grid.

It is also important to highlight that our professor Lisa Blaschke guided my group members and I towards the successful completion of our project. I will therefore emphasize that my team members and I will continue to work on our final group project, with the continuous support of our instructor Lisa. We have used Google docs, emails and our study group discussion areas to communicate on our project. We recorded our information in both Google Doc and Study Group areas. Ninety-seven percent of our communication was done in our study group area. All challenging issues were solved very timely, by student-to-student and instructor-to-student communication. This project has certainly widen my knowledge on OMDE 601 9040 Foundations of Distance Education & E-learning (2152) course, which uphold the course objectives in the syllabus. I will therefore re-emphasize that I am looking forward to work with my group members towards the completion of our final project.
